## RESULTS

Geniographics has provided this template to assist in preparation of a medical or scientific research poster. The dimensions are set to 36" high by 48" wide but prints can also be scaled up proportionally as large as 54" high by 72" wide. When you order your print we will know to scale the original file to the size you specify.

For other sizes, visit us at [www.geniographics.com](http://www.geniographics.com) or send an email request to [info@geniographics.com](mailto:info@geniographics.com) or give us a call toll free at 1.800.790.6091.

**The various elements and text boxes included in this template are examples of what we commonly see on posters of this kind. They are simply placeholders and you should feel free to add, delete, re-arrange, re-name, or re-size as best suits your needs.**

Choose Geniographics to print your poster and we will perform a free design review and advise you if we see anything that may be a concern for printing.

We print directly from PowerPoint so your poster will look just like it does on screen. Other printing outlets (Kinko's, for example) convert your file to another format prior to printing. This can result in elements shifting, loss of effects, or altered colors. By printing from the same version of PowerPoint that your file was created in, Geniographics gives you the most accurate reproduction available.
